

# Dax's Story

After my son's fourth ear infection in two months we found ourselves at Children's Mercy again. After speaking with three doctors and an allergy specialist we found that Dax has serious allergies that were causing all these infections. Unfortunately, there was nothing more they could do to treat him. He had topped out on the amount of antibiotics he could take and he was too young to be treated for the allergies. We could have tubes put in his ears but my husband and I didn't want our 1 year old going under the knife! So, with all the doctors together in our room I asked the question I thought no MD would want to hear. "What about a chiropractor?" I said. The four of them agreed that we should give it a try. (That's why we love Children's Mercy!)

I called Dr. Brown immediately and we saw her later that day. That was over six months ago and we haven't been back to Children's Mercy since! Dax has showed NO signs of allergies, no ear aches, no watery eyes, NOTHING! My husband and I still find it hard to believe at times that Dax could go from being so sick with fevers, rashes, etc. to perfectly healthy without medication or anything. No parent wants their child to suffer or be in pain but also no parent wants their child full of meds all of the time either.

Try out the chiropractic route for your kids and yourself. It worked for us. Plus Dax loves getting his adjustments. It feels good to him and he doesn't have to take any more yucky medicine!

Thanks Dr. Brown!!  
Allison & Dax
