Dr. Mindy Brown
Innate Family Chiropractic
4020 Baltimore Avenue
Kansas City, MO 64111

Dear Dr Brown:

I would like to give my testimonial as to how effective and healing your chiropractic treatments have been for me. I have been in chiropractic care for over twenty years now so I appreciate the value of having the body properly aligned.

I am a middle age woman who has been in three fairly serious car wrecks so I am no stranger to back pain. I took to using chiropractic care and massage for my back instead of surgery many, many years ago. I have found that the chiropractic care has been the only way for me to keep my body pain free and fully functioning.

The last two years, I have been struggling with a neuro-muscular disease where once the muscles contract they will not release easily. Some days in the past, I have had to use a cane in order to get around more effectively despite regular chiropractic treatments. It seemed like the leg muscles would just never release once they contracted.

I started coming to your clinic in late August 2007 and was so excited to see a chiropractor in our mid-town neighborhood. I have gotten excellent results from your bi-monthly treatments and for the first time in two and a half years I have gone almost five months without using a cane! In fact, I felt so strong that last month I took my grandson skiing and was able to stay up for a relatively long time on the skis with no after effects.

I feel that your complete adjustment, which is very lengthy compared to other chiropractors, has helped my legs and pelvis muscles stay in alignment better and this in turn cuts down on the spasms which are both painful and debilitating. I appreciate your thorough and thoughtfulness in considering my health needs.

Your caring and compassion attitude makes patients feel welcome and I love your homelike office. If I can share the word about how effective your treatments have been for me, feel free to give my phone number to others. I can be reached at 816-931-1040 Ext 102 Again, thanks to your care my health has improved significantly.

Best wishes,
